**2. Citations and explanations**

Document 1 discloses a method of identifying the type of optical disc. It points out attaining pull-push tracking error signals at different radiuses, judging the type of disc used with them. Also, it discloses in detail getting the amplitudes of pull-push tracking error signals at the radius of  $r=25\text{mm}$  and  $r=23.7\text{mm}$  respectively, namely, pp25 and pp23.7. Then, if it is satisfied that  $(pp_{25}+pp_{23.7}) > pp_{r2}$ , the used disc will be DVD-R, wherein the value of  $pp_2$  is 2. So the whole content of Claim 1 is disclosed, Claim 1 seems lacking of novelty defined by PCT Article 33(2). Similarly, the magnitude of pull-push tracking error signal involves various aspects, of course the amplitude belongs to one of them, thereby it is considered D1 also discloses Claim 7, it still lacks of novelty.

Claim 2 and 8 are dependent on Claim 1 and Claim 7 respectively, their additional features are well known to the skilled person in the art, therefore they lack of inventive step defined by PCT Article 33(3).
